

Mosquito Control

They are a familiar part of summer and we have all suffered the uncomfortable itch from their bites, but mosquitoes can also transmit serious diseases, such as West Nile Virus. The best way to control these pests is to eliminate their breeding grounds. Another course of action is to kill them on contact. For the ones left you can use repellents to make you and your space less attractive to them. Here is a list of some products you'll find at Johnson's to help protect your family from these unwanted pests.

TO CONTROL MOSQUITOES

Bayer Power Force™ Mosquito Killer II

No mixing! Hook up to hose and spray. Kills mosquitoes and other nuisance pests on contact and keeps protecting for weeks with a single application. Spray on lawns, trees, shrubs, flowers and around the home. 32 oz. covers 5,333 sq. ft.

Bonide Mosquito Beater

Easy to apply granules. Simply broadcast on the ground at least one hour before any yard activity. Provides excellent results for up to eight days, depending upon rainfall and wind currents. 1.3 lbs. treats 4,000 sq. ft.

Hi-Yield Indoor/Outdoor Broad Use Insecticide

This is a permethrin concentrate. For large area coverage, such as lawns, use through a hose-end type sprayer. Spray outside surfaces of doors, windows, etc. 1 2/3 oz. per qt. of water to treat 400 linear ft.

Mosquito Dunks

Kills mosquitoes before they're old enough to bite! Float in standing water where mosquito larva grow—water gardens, bird baths, unused swimming pools, rain barrels, flower pots. One dunk per 100 sq. ft. of water surface. May be used whole or broken into portions. Will last 30 days or more. **Not** to be used for drinking water.

Microbe-Lift Biological Mosquito Control

Naturally safe liquid, kills the larva of mosquitoes. Microbe-Lift/BMC kills developing mosquitoes before they become breeding, biting adults. Specially formulated for decorative water gardens, fountains, bird baths and areas where standing water exists. 540 square foot coverage per teaspoon. Use every one to two weeks as needed.

TO REPEL MOSQUITOES

Mosquito Repellent Coils

For outdoor use only. Best in a semi-confined site. Results and duration depend on airflow. Place a smoldering coil every 8-10 ft. around the area to be protected. Comes with metal stand.

Dr. T's Mosquito Repelling Granules

All natural, oil based, contains no poison. Lightly sprinkle this dry granular around the area to be occupied about 12 hours ahead of time. 5 lb. shaker top container treats 3-4,000 sq. ft.

All Terrain Herbal Armor

A safe, DEET-free alternative to chemical repellents. The basic Herbal Armor Insect Repellent comes in a convenient pump sprayer. It consists of a combination of six essential oils, which are EPA approved and environmentally friendly. Applied liberally to skin, this pleasantly scented product effectively repels mosquitoes and other insects for up to three hours. Herbal Armor is time released, water resistant and sweat resistant. Herbal Armor also comes in a lotion form and a formulation containing an SPF 15 sunscreen.

Sandalwood Mosquito Stick

Repels mosquitoes naturally. Just light the tip of the stick, blow out the flame and place Sandalwood Mosquito Sticks in pots, pavers or the ground for up to 4 hours of mosquito-free outdoor living. When burnt, the sandalwood combines with the botanicals to effectively repel mosquitoes, gnats, and small black flies. Made with sandalwood and natural botanical extracts of citronella and geraniol. Mosquito Sticks are extremely safe for people, plants, pets and the environment.

Bayer Mosquito Killer Plus

Aerosol fogger to use in areas prior to events. Kills and repels mosquitoes and other listed pests on contact and keeps on protecting for weeks. Use in bushes, grass, breeding areas, picnic areas and on ornamentals. Available in 16 oz. fogger.

TERRO® Mosquito Killer

Kills and repels mosquitoes and other listed pests. Powerful fogger nozzle allows for easy coverage of yard and patio. Rapid knockdown and kill provide long-term control. Available in 19 oz. fogger.
